

AUSTRALIAN ALMONDS – *Naturally the best!*

The Australian Almond Industry has gained international respect by consistently delivering the highest quality AUSTRALIAN ALMOND products to discerning markets throughout the world. Our reputation is upheld by rigorously implemented ‘world best practices’ throughout all facets of the industry.

Australia is the only major southern hemisphere producer which assures that freshly harvested and processed AUSTRALIAN ALMONDS are ready for market in March each year.

AUSTRALIAN ALMONDS are full of taste and loaded with a long list of health benefits. Grown in rich soils and in a clean environment, low in pest and disease, guarantees that AUSTRALIAN ALMONDS are *Naturally the best!*

Indulge in AUSTRALIAN ALMONDS without the guilt

Supported by extensive nutrition research, consuming almonds in their various forms provides a healthy mix of essential micronutrients, vitamins and minerals. Almonds while having *no cholesterol* are also a good source in *vitamin E* and *magnesium* and a good source of *protein*, *fibre*, *copper*, *phosphorous* and *riboflavin*. Eating almonds daily also provides a healthy dosage of *calcium*, *iron*, *zinc*, *niacin* and *potassium* while also containing essential *monounsaturated fats*.
